Homework-5_part2 Report

Ferdi Sönmez

161044046

1)Problem Solutions Approach

Finding the result of the expression on the tree formed by the calculation function on this tree by adding the expressions I received from the user to the tree structure by dividing them into pieces according to the spaces. But I couldn't run my tree-adding function,I wrote some functions and classes in it.I wanted to send it maybe you would rate it.I couldn't get test data because it wasn't working properly.

2) Class Diagram
